SUMMARY

I am an Informatics student at Universitas Ahmad Dahlan with experience in software development, particularly as a Frontend Developer. Throughout my studies, I have mastered various technologies such as HTML, CSS (including SCSS), JavaScript, and frameworks like Tailwind CSS, Vue.js, and React. Additionally, I have experience using Laravel to build web applications, efficiently integrating the backend with the frontend, and optimizing application performance. During my studies, I interned at BSI UAD, where I had the opportunity to design and develop responsive and visually appealing user interfaces. I also utilized tools such as Flowbite and the Blade template engine for animations and web component design. I am passionate about continuous learning and growth, and I believe that my technical skills and experience—especially in combining Laravel with Vue.js and React—will make a significant contribution to the development team in this company. I am ready to take on challenges that enhance frontend design and development quality.

EXPERIENCE

Fullstack Developer

AWBS Media ↗

10/2025 - Present

As a Full Stack Programmer at AWBS Media, I worked with system analysts, testers, and DevOps engineers to develop and integrate web applications and APIs using Laravel, Yii, and CodeIgniter, focusing on performance, scalability, and reliable deployment.

Front End Developer

SD Muhammadiyah Sapen (Freelance)

12/2024 - 06/2025

Created a registration React.js-based and web application information management at for student SD Sapen.

Frontend Developer

Sistem Informasi Manajemen Aset Muhammadiyah

11/2024 - 05/2025

a web-based system designed to manage Muhammadiyah's assets in a structured and efficient manner. This system was developed using React.js for the frontend, ensuring a modern, responsive, and fast appearance.

Front End Developer Internship

Biro Sistem Informasi UAD ↗

08/2024 - 08/2025

As a internship, I collaborated with a team on one of the Partnership UAD, Eclairance UAD, projects, a website used by UAD to manage university partnership and research management. In this project, I was responsible for ensuring smooth integration and functionality while effectively collaborating with team members.

Fullstack Developer
